## THE POWERPLANT DUAL FORCE IS VERSATILITY TIMES TWO

When our customers told us they wanted a versatile tool that could provide a high-performance and robust on-board air compressor and a legendary WARN winch, we listened. The WARN PowerPlant™ Dual Force is an award-winning combination of a premium air compressor and legendary WARN winch in one vehicle-mounted unit.

The PowerPlant Dual Force is available in two versions: HP and HD. Both PowerPlant models get an air compressor with a 100 PSI (690 kPa) maximum air pressure rating, a 1/2 gallon (1.9 L) on-board air reservoir and intercooler, high air-flow ratings, and a thermal protection switch to prolong motor life. All this adds up to a unit perfect for airing up tires, inflating rafts, powering air tools, and more.

The PowerPlant Dual Force HP is the best choice for off-road enthusiasts. Its fast line speed and 9,500 lb. (4310 kg) pull rating are well suited to recreational off-road use.

The PowerPlant Dual Force HD is perfect for contractors, tradesmen, farmers, and ranchers. With its longer duty cycle and brawny 12,000 lb. (5440 kg) pulling capacity, you'll be able to recover your pickup or SUV without worry.

All PowerPlant models come with a remote control with thermometric LED indicator, 25' (7.6 m) of coiled air hose, a tire pressure gauge, and dual air chuck.

### 9.0Rc – BIG PERFORMANCE IN A COMPACT UNIT

Competitive rock crawling means tackling tough climbs and tight turns. That's why rock crawling rigs need a low-profile, lightweight winch like the WARN 9.0Rc that delivers maximum power in a compact, 54 lb. (24.5 kg) unit.

The 9.0Rc features a short-drum, 9,000 lb. (4080 kg) pull rating, and a 4.8 hp Series Wound motor for fast line speeds. Plus, an exclusive multi-segment Cam Actuated Brake gives positive operator control during winching.

The 9.0Rc comes with 50' (15 m) of 3/8" (9.5mm)-diameter synthetic rope; a red finish with chromate undercoating for superior corrosion resistance; a rugged 360-degree swivel hook and thimble; aluminum hawse fairlead; extreme-duty winch sealing; and a ballistic nylon sliding sleeve that provides extra protection against abrasion and wear.

The 9.0Rc is for rock crawlers looking for efficiency, reliability, and legendary WARN performance.

### NEW WARN WINCH REMOTE

The new WARN remote controls incorporate an improved ergonomic design and intuitive features that help operators better navigate through winching operations. WARN remotes have been designed with an intuitive rocker switch with an elevated dimple on power-out, a recessed dimple on power-in, and a high-impact polymer grip that allows operators to pay more attention to the winching situation and less on the remote itself. By using the sense of feel rather than sight, operators can confirm the winch line's direction without relying on visual cues on the remote's handle.

Increased control surface area on the remote allows for easy use, even while wearing gloves.

Some of the new units also contain a high-intensity LED flashlight in the bottom of the handle for extra visibility in hard-to-see applications.

PN 72567 Standard Remote with 12' (3.7 m) lead

PN 72568 Remote With Flashlight (for all current WARN truck winches except 9.5ti, 9.5si, 16.5ti and PowerPlant)
